Flat Pack Kits

Stud Frame Kits are 'Flat Packed' for the "do it Yourself" client.

This enables us to send our kits anywhere in Australia using a National Freight Service. The Flat Pack kits are packed individually into walls and roof trusses.

All parts are labelled and each wall or roof truss has it's own plan.

NO drilling or cutting required - all you need is a battery drill with a ratchet facility.

Steel Stud Frames using Plywood

appearance

Steel Stud Framed sheds have the ability for many types of cladding.

- ~ Plywood.
- ~ Cement fibre sheets
- ~ Horizontal steel cladding
- ~ Weatherboards
- ~ EPS or Styrene cladding
- ~ Vinyl lining boards

It doesn't stop on the outside. Steel stud framed walls provide a simple way of lining the internal walls, no extra steel battening required, as with portal frame sheds from the majority of manufacturers. **Special Orders welcome**
